

ME/CS 133(a): Homework #3

(Due Monday Oct. 30. 2017)

Problem 1: (20 points) Do Problem 6(a,b,d,e) in Chapter 2 of the MLS text. For part (d), only carry out the problem for sub-parts (iii) and (iv).

Problem 2: (5 points) Prove, using the definition of a rigid body as a set of points, that a rigid body moving in a 3-dimensional Euclidean space has 6 degrees-of-freedom (DOF).

Problem 3: (15 points) Do Problem 11(a,b,d) in Chapter 2 of the MLS text.

Problem 4: (15 points) Consider 2×2 complex matrices of the form:

$$M = \begin{bmatrix} z & w \\ -w^* & z^* \end{bmatrix} = \begin{bmatrix} (a + ib) & (c + id) \\ -(c - id) & (a - ib) \end{bmatrix}$$

where:

$$\det(M) = zz^* + ww^* = 1$$

and $z, w \in \mathbb{C}$, and $*$ denotes complex conjugation. Such matrices form a matrix group termed the “special unitary matrices” of dimension 2, $SU(2)$.

- **Part (a):** Show that matrices:

$$\begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix} \quad \begin{bmatrix} i & 0 \\ 0 & -i \end{bmatrix} \quad \begin{bmatrix} 0 & 1 \\ -1 & 0 \end{bmatrix} \quad \begin{bmatrix} 0 & i \\ i & 0 \end{bmatrix}$$

form a basis for $SU(2)$. The element i is $\sqrt{-1}$. I.e., all elements of $SU(2)$ can be expressed as some combination of these elements. Next show that elements of $SU(2)$ are isomorphic to the unit quaternions. That is, there is a one-to-one correspondence between each element of $SU(2)$ and a unit quaternion.

- **Part (b):** Show that the special unitary representation of a rotation in terms of z-y-x Euler Angles can be computed as :

$$\begin{bmatrix} \cos \frac{\psi}{2} & i \sin \frac{\psi}{2} \\ i \sin \frac{\psi}{2} & \cos \frac{\psi}{2} \end{bmatrix} \begin{bmatrix} \cos \frac{\phi}{2} & \sin \frac{\phi}{2} \\ -\sin \frac{\phi}{2} & \cos \frac{\phi}{2} \end{bmatrix} \begin{bmatrix} e^{i\frac{\gamma}{2}} & 0 \\ 0 & e^{-i\frac{\gamma}{2}} \end{bmatrix}$$

where ψ , ϕ , and γ are respectively the rotations about the z, y, and x axes.

Problem 5: (15 points) Read the instructions on how to download the ME/CS 133 Virtual Machine Environment (see the download link right below the link to this homework). Follow the instructions, and then (as detailed in the instructions) include a screenshot that demonstrates the successful completion of the download and installation.
